

7 Series DPO

Built to Grow with Your Evolving Needs

Bandwidth Upgrades, Conversions, and Trade In/Trade Up

DP0714AX

Your 7 Series can grow with your evolving needs.

As signals get faster and new standards are developed, our full range of options ensure your 7 Series is kept current and ready for the task at hand.

Bandwidth Upgrade

Upgrade the bandwidth of your current 7 Series DPO unit

- Increase bandwidth to handle faster signals and testing new standards.

Conversions

Convert your existing 70KC/DX or 70KSX unit to an entirely new 7 Series DPO unit

- Improve system throughput, increase bandwidth to handle faster signals and testing new standards.

Trade In/Trade Up

Trade in/Trade up your older Tektronix oscilloscope for a brand new 7 Series DPO unit

- Receive credit based on the age of the instrument (as determined by Tektronix)

What stays the same:

Serial Number:

Your upgraded or converted unit, where available, keeps its original serial number, but receives a new model number reflecting its new performance capabilities.

Original Options:

All options on the original unit are transferred to the upgraded or converted unit, where available, to preserve your investment.

Service Contracts:

Contracts transfer to the upgraded or converted unit, where available.

Contact your local Tektronix field representative for further details or reach out to us [here](#) and we will contact you as soon as possible.
